

Software Release Note – Version 1.8.2

Application	Version	Release Date	Pre-Requisite
MEDILOGIK EMS	1.8.2	23/12/15	MS Silverlight V5.1

This Release Note is inclusive of all issues released in all v1.8 versions.

New Features

- [EMS-124] - Added per-endoscopist phrasebook functionality
- [EMS-1241] - Provide the ability to record bowel preparation on the Summary step for unscheduled (& non-EMS scheduling) emergency procedures
- [EMS-1280] - Added a manual image capture button within In Room Screen for use in the event of trigger cable issues
- [EMS-1313] - Ability to record specific bowel screening referral options per country
- [EMS-1345] - Created an "Outstanding Nurse Patient Comfort Scores" dashboard panel
- [EMS-1352] - Integrate the ability to modify the organisation logo within the web app for system admins.

Improvement

- [EMS-1264] - Add Referral Source to Endoscopist Log Book report
- [EMS-1260] - Procedure Report Output – Removed the confusing "No Follow Up" text on report if no follow up had been recorded.
- [EMS-1243] - User's active panels now saved against the user, not the user & current site combination
- [EMS-1288] - text throughout the application clarified so that 'Intra Procedure Adverse Event' reads 'Immediate Adverse Event'
- [EMS-1270] - Improved Prague classification report output to include 'C' and 'M'
- [EMS-1273] - Added a "view episode" button to external events panel where applicable
- [EMS-1066*] - Panel Refresh and Update Functions
- [EMS-1314] - On the "Summary" step PR exam and Rectal J-Manoeuvre are now mandatory to reflect new JAG guidelines -
- [EMS-1293] – New follow up option of "Follow up to be decided"
- [EMS-1317] - Lowered minimum drug dosage to 1 across the pathway (unless minimum value was already lower than this).
- [EMS-1337] - When the "In Room" step is loaded for the first time for a given episode, if the user is not the listed performing endoscopist they will be required to select the actual In Room endoscopist. This is to support the concept of generic lists, and to accurately reflect the performing endoscopist in the event of staff illness or cover.

Software Release Note – Version 1.8.2

- [EMS-1346] - The In Room "Load Staff Defaults" button is now disabled in multi-procedures after the first procedure to prevent accidental overwriting of staff during the second procedure.
- [EMS-1125] - Improved Urease result recording by allowing recording from the patient menu (under Current Episode), and now prompting to reprint a signed off procedure report if appropriate..
- [EMS-1308] - In Flex Sigmoidoscopy the default intended extent is now the splenic flexure.

Bug Fix

- [EMS-1256] - Staff List on the "In Room" screen has been changed and is now based on episode site. This does not affect scheduled episode site for non emergencies
- [EMS-1240] - Bronchoscopy appears as a procedure type on PEG and stent reports. This has been corrected
- [EMS-1237] - Appointment Scheduling is confusing where available slot time has elapsed
- [EMS-1236] - Unable to create schedule in a slot whose start time has passed
- [EMS-1275] - Resolved an issue where exporting SSRS reports to Excel did not work as expected in IE
- [EMS-1284] - The unscheduled bowel preparation recording added in 1.8 as EMS-1241 was not being reflected within the GRS audit report
- [EMS-1300] - It is no longer possible to specify a resolution for a post-procedure/post-discharge adverse event of Death.
